FOR IMMEDIATE RELEASE

**MOTIONROCKET LLC SELECTED TO CONTROL NEW LED SCOREBOARD FOR
CLUB LEON SOCCER STADIUM.**

Launchpad Clip Server and CG Software has been selected by Evolution LED of Scottsdale, AZ to control the new LED screen for the Leon Soccer Club in Guanajuato, Mexico.

October 28th 2009 – Launchpad Clip Server and CG Software has been selected by Evolution LED of Scottsdale, AZ to control the new LED screen for the Leon Soccer Club in Guanajuato, Mexico.

The new installation will not feature any traditional scoreboards; rather the LED screen will display all pertinent game data as a transparent overlay. The game data and game clock are all controlled by Launchpad web-based ASP interface. This interface allows the game data to be updated by any computer terminal on the same network as the Launchpad PC or even a PDA! This allows the Launchpad operator to focus on controlling the clips and bug overlays.
